

Web Site Hosting Services

Putting your Web Site online with robust, reliable service

Web hosting is what you need to put a website online on the internet – it's the 'space' where your website lives.

Different sites need different technology, which is why we offer both **Windows** and **Linux** Hosting options, so matter whether your web site talks the technical language of ASP, ASP.NET or PHP – we've got a plan that will suit you.

Plus for the most demanding needs we can offer our more advanced Pro and Xi range of packages – high specification shared hosting for demanding applications.

Grown beyond Shared Web Hosting?

Ask us about our VPower Virtual Servers – hugely flexible hosting for demanding needs.

Web Site Hosting – Entry Level Linux Packages

Linux packages are perfect for hosting sites using the PHP scripting language – and are ideal if you want to host systems such as WordPress Blog system. They're perfect for smaller sites, those which don't primarily get used for retail/online trading, and especially where you're happy to "self administer" your account and preferences via the included cPanel control system.

Packaged with plenty of functionality as standard, they're a great choice for starting out.

Package	Linux Bronze	Linux Silver	Linux Gold
Domains Allowed Per Package	1	1	1
Storage Allowance	500MB	750MB	1000MB
Monthly Bandwidth Allowance	20GB	20GB	20GB
