

# Anti-Virus Software

## Simple Protection against Viruses and Malware

What would you do if all your computers and phones crashed for 12 hours? Worse still, if you lost all your files and systems? Doesn't bear thinking about, does it? What if your whole database was spammed with phishing emails – or if you passed on the virus to your customers?

Don't risk lost income – and lost customers – get protected with VPW virus protection packages. We can supply, recommend and maintain the right solution for you and your system from as little as £15 per year. We also offer a rescue service if it's too late, and you've fallen foul of the virus problem.

### Get Anti-Virus protection because:

- ✔ It keeps your systems secure from viruses, malware and other issues that cause issues with your computer system
- ✔ It saves you the embarrassment of transmitting a virus to someone else should you get attacked
- ✔ Save the hassle and disruption caused if your computer does get attacked
- ✔ Example slides with illustrative content for indication of best practice use

All businesses should have an anti-virus solution in place, whether they're sole-traders or complex organisations.

We can provide arrange of solutions from licences for between 1-5 computers, right up to Anti-virus Border Protection for larger organisations with advanced networks.

### Got an Anti-Virus Product?

We recommend using AVG – in our experience it gives the best balance between protection and impact on performance of your systems.

Talk to us about how you can switch to AVG – and benefit from competitive transfer discounts to stop you losing out on any time bought from your old provider. Protection made easier.

## What type of Anti-Virus?

When choosing Anti-Virus, there are choices on the type of package to get. Some provide just simple Anti-Virus, while others will add anti-malware, real-time checking and updates, and other features. It also varies if you need to protect servers or networks and not just desktops.

### Desktop Protection can offer you:

- ✔ Background Scanning
- ✔ Web Browsing Checks
- ✔ Phishing Scam Protection
- ✔ E-Mail Monitoring
- ✔ Malware Management

### Server & Network Protection can offer you:

- ✔ Centralised Management and Updates
- ✔ Protection for E- Mail and File Servers
- ✔ Content Filtering and Access Control

## What should I choose?

Basic Anti-Virus protection is a must – it is an entry level option and if you're on a tight budget this is the least you should consider. This can also be a good choice for older computers.

It is worth looking at more advanced options when you have users who regularly use the internet to browse, where your team are unlikely to be sufficiently knowledgeable to spot phishing scams and other less obvious types of attack.

Our *Internet Security* variants give you the most advanced protection available for desktop (and laptop) systems and give you the best peace of mind for your business systems.

### I already use AVG...

We offer renewals and transfers of your license – and guarantee to be cheaper than buying direct from AVG.

### How much does it cost?

AVG is great value for money, and starts from just £15 per year – we also offer significant discounts to qualifying charities.
