

# Agility Desktop Web Files

## Smart access to your files – on PC, Mac or Smartphone/Tablet

**Ever wished you could have easier access to your files and documents? Wish that presentation you had could easily be sent to your tablet?**

Agility Desktop Web files makes it easy to access and use your documents. Offering web based storage for your files and support for uploading and downloading those files across many smartphones and tablets as well as the traditional PC or Mac system. It's available as a standalone "cloud" file storage service, or as an additional option to our Agility Desktop service. The choice is yours.

## What does it do for you?

- ✔ Makes it possible to access your documents when you're using your smartphone or tablet computer
- ✔ Let's you grab documents "on demand" – for example if you're visiting a customer site and need that vital presentation but forgot to bring it with you
- ✔ Makes your life simpler – no servers or backup systems to buy or maintain – it's all backed up and we manage the rest for you as part of the cost
- ✔ Consistent – wherever you access your data, your files will be the same. If you're using Agility Desktop, see the same files you would then too.
- ✔ More secure – your data is kept secure, and only authorised users with the right details will have access
- ✔ Grows with you – adding new users is simple, and if you need more storage it's easy to upgrade your account
- ✔ Simple charging – fixed monthly costs per person with no hidden extras

## What do customers say?

We wanted an affordable, scalable and secure solution for a new project – Agility Desktop ticked all the boxes and VPW seamlessly managed the migration from our existing systems.

One week after going live, the manager broke his leg and because we had Agility Desktop, he was able to carry on working from home, with full access to all his apps, files and email. His ability to continue working saved him having to take sick leave.

**MR DARK, ICT MANAGER  
GOLDENSTONES LEISURE**

## So what can you do with Agility Desktop Web Files?

Agility Desktop Web Files makes it simple to access your files from a Web Browser on PC/Mac or on a smartphone or tablet. You don't have to mess around with USB sticks, or worry about installing software to access your "cloud storage" services.

### Key Features

- ✔ Simple "per user" costs
- ✔ Backups of data included
- ✔ Easy to expand/change
- ✔ Works with other services such as Agility Desktop and Agility Mail

### Access via...

- ✔ PC – Internet Explorer, Chrome and Firefox
- ✔ Android Smartphones & Tablets (such as the Xoom)
- ✔ iPhone and iPad
- ✔ Apple Mac (OS X)

## More advanced uses for Agility Desktop Web Files...

Use it as a centralised storage resource for "company documents" – such as presentations, or provide staff with quick access to HR forms etc.

Use Web Files access to share files with key customers or suppliers – use it as a cloud storage service which doesn't need "plug ins" or installation.

Use it as a secondary backup service for your photos, documents and other critical files, and have quick access if you need them back online

There are plenty of other things you might want to do with the service, and if you're not sure if it's possible, why not ask us – or even take a trial so you can find out for yourself?

### How about trying the service?

We're happy to provide a demo of the Agility Desktop Web Files service to you – just ask our team. If you're thinking of using the full Agility Desktop service, we'd be happy to give you an in-person demo too, or arrange a remote presentation to show you how it can help you out

### How much does it cost?

To add Agility Desktop Web Files to your existing Agility Desktop service, it's just £3 per user per month. For a standalone Web Files service, costs start from just £10.00 per month per user, including 15GB of storage as standard. Custom options available – just ask our team for info.
